EFFECTIVE ENVIRONMENTAL, HEALTH & SAFETY MANAGEMENT

Verde provide specialist support to design teams, construction companies and developers at all stages of a development from pre-planning to construction phase management. Our aim is to ensure that you manage your environmental health and safety risks from the earliest stages of the construction process, thereby reducing delays and unexpected issues, and ultimately saving money and adding value.

Our services include:

- Site investigation
- Soil classification and disposal management
- Noise and vibration impact assessment
- Appropriate Assessment / Natura Impact
- Hydrogeological assessments
- Discharge licence application
- Dewatering management
- Occupational assessment for dusts, crystalline silica, noise, vibration, etc.
- Construction noise and vibration compliance monitoring

We work with companies on a site-by-site basis or longer-term contracts and frameworks to provide excellent value to the client and the contractor. Our services therefore can include short term once-off surveys or long-term supervision and management depending on requirements.

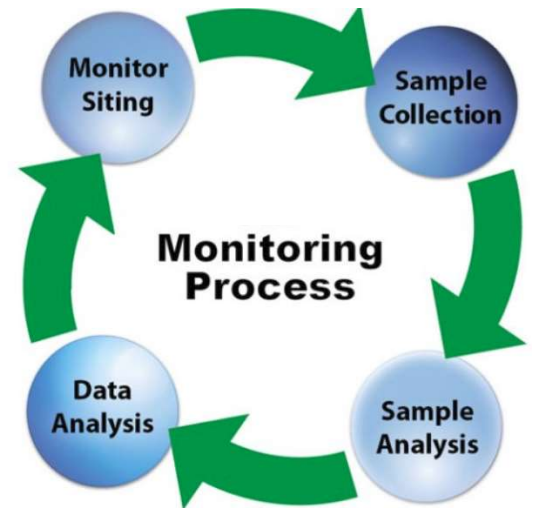

Working for both the client and the contractor, we can deliver complete packages that handle environmental health and safety issues at all project stages. This includes providing a bespoke package of services tailored to you and your client's needs.

OUR APPROACH

Verde will provide you with independent and impartial expertise and will ensure that the most appropriate and cost-effective approach is taken to match your specific requirements.

Verde offer a nationwide service to help you:

- Effectively manage health & safety, planning and environmental requirements.
- Develop control and monitoring protocols.
- Mitigate environmental and human health liability risks.
- Liaise with regulators, legal and insurance professionals, public and relevant stakeholders.

OUR PEOPLE

Kevin Cleary, Operations Director - Chartered Environmentalist and Professional Geologist, with over 20 years' experience advising clients on environmental projects. Kevin has built his reputation on providing quality management at all stages of project execution and takes pride in effective project management to meet budgetary and time constraints.

Cyril Tynan, Senior EHS Consultant – Chartered Environmentalist and professionally qualified in the areas of environmental protection, occupational health and safety and acoustics. Cyril has 18 years' experience in project management, environmental and human health risk assessment, regulatory compliance management, licensing and monitoring.

OUR ACCREDITATION

Quality, Health & Safety and Environmental performance are cornerstones of our business.

We maintain our accreditation to ISO Management Systems Standards and are continually looking to improve our performance.

We also hold memberships and affiliations with relevant industry and professional bodies.
